Company Overview

Founded in 1996, Beijing-headquartered and Shanghai Stock Exchange-listed Beiqi Foton Motor Co Ltd (Foton) invests heavily in research, development and state-of-the-art manufacturing facilities and strives to provide global automotive motor vehicle markets with high quality, affordable vehicles powered by sourcing the best of current as well as emerging technologies.

Foton has R&D centres in Beijing, Germany, Japan and Taiwan, joint ventures with Cummins and Daimler-Benz, and technical supply agreements with transmission specialists Getrag and ZF (Germany) and Aisin (Japan), Borg Warner (USA) for 2<-->4WD transfer units; Bosch (Germany) for electronics and dependent systems, and Dana (USA) for axles and differentials.

Strong joint ventures with globally-reputed major component brands, sustainable engineering, safety in design and advanced systems and technology are embodied in every Foton vehicle.

Water Symptoms

- Hard water
- High in Calcium
- Staining glass and paint of vehicles during detailing

HWTA Devices Used

Commercial Edge

Result

Since fitting the Commercial Edge a significant change of water quality has been observed. It is softer and has eliminated the calcium staining on vehicle paintwork and glass (white water marks on car).
